BREMBO COMPLETE RANGE: EXCELLENCE AT YOUR SERVICE

ALL CARS DESERVE BREMBO

As an experienced manufacturer of original equipment brake systems, Brembo is able to offer a complete catalogue of quality

replacement parts from which to select the best for your vehicle: disc and drum brakes, pads, brake shoe kits and hydraulic

components. A range of products unequalled for performance and reliability.

BRAKE DISCS

BRAKE PADS

DRUM BRAKE KITS

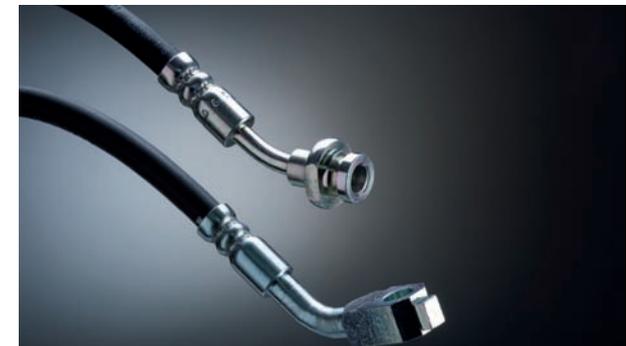

HYDRAULIC COMPONENTS

Brembo discs are the most popular in Europe, thanks to the uniquely innovative features they offer: Easy Check, Pillar Venting Technology (PVT), High Carbon content (HC), Corrosion-resistant coating, Bearing Kit, Screw Kit, and the Brembo Max range.

Brembo pads combine perfectly with Brembo discs to deliver maximum braking safety, guaranteeing solid performance, durability and dependability by virtue of their OE or OE-equivalent quality.

Brembo kits make the best sense for workshops: the Standard Kit, which contains all necessary components, and the Kit & Fit, preassembled so as to save the mechanic considerable time and effort.

Brembo offers a complete range of replacement hydraulic components: brake hoses, brake master and slave cylinders, brake control valves, clutch master and slave cylinders.

A HISTORY OF SUCCESS

Brembo enjoys undisputed leader status, blazing a trail of innovation in all automotive sectors: motor cars, motorcycles, commercial and heavy goods vehicles, high performance and racing. Whatever the application, experience and enthusiasm provide the key, and always with that inimitable Brembo style.
